Professional Summary

Information Systems graduate (AAST, 2026) working across full-stack development and data analysis. Builds client software at Ascendra, including school management and gate access systems, and has delivered 20+ websites for US businesses with Vertex Reviews. Turns data into insight with Power BI dashboards and Python machine learning workflows, with hands-on ML experience from Telecom Egypt. Client-facing sales experience adds strong communication and requirements-gathering skills.

Education

BSc **Arab Academy for Science, Technology & Maritime Transport**, College of Computing and Information Technology — Alexandria, Egypt
Information Systems — 2022 – 2026

Collège Saint-Marc, Secondary Education — Alexandria, Egypt
