PROFESSIONAL SUMMARY

Computer Science student and Full Stack Developer specializing in data analysis, artificial intelligence, and production software. Co-founder at Ascendra and Full Stack Developer at Vertex Reviews, shipping real products for businesses in Egypt and the United States. Experienced in machine learning workflows, business intelligence dashboards, requirements analysis, and client-facing communication from one year in real estate sales at ElitePlus.

EXPERIENCE

Co-founder | Ascendra

Present | Alexandria, Egypt

Co-founded a technology studio building custom software, conversion-focused websites, and offline-first IoT systems for clients in Egypt and the United States.

- Help shape and ship Ascendra product direction across software, websites, and IoT
- Contribute to full-stack delivery for real business platforms and digital products
- Support partnership as authorized Egypt operations partner of Vertex Reviews (New Jersey, USA)

Full Stack Developer | Vertex Reviews

Present | New Jersey, United States (remote / partner ops)

Full-stack development for Vertex Reviews, a Google Business Profile and reputation management company serving US businesses.

- Build and maintain production web experiences for Vertex Reviews
- Support product storytelling for services, packages, and client conversion flows
- Collaborate across Ascendra x Vertex partnership delivery

Real Estate Agent (Sales) | ElitePlus

2025 - 2026 | Egypt

One year in real estate sales, developing strong client communication, negotiation, and relationship-building skills in a client-facing commercial environment.

- Engaged clients through the real estate sales process
- Built strong communication and interpersonal skills through daily client interaction
- Practiced negotiation and relationship management in a competitive sales setting

Machine and Deep Learning Developer (Intern) | Telecom Egypt

Internship | Egypt

- Worked on machine and deep learning development tasks
- Applied data preparation and model-oriented problem solving in an enterprise environment

Requirements Analyst (Intern) | AppSoft

Internship | Egypt

- Analyzed software requirements and clarified system expectations
- Supported structured documentation for implementation-ready specifications

PROJECTS

Vertex Reviews Platform | Full Stack Developer

https://www.vertexreviews.com

Production website and service platform for Google Business Profile optimization, review monitoring, growth strategy, and service packages for US businesses.

- Live production site for a US-based reputation management company

Ascendra | Co-founder

https://maroweb.net/Ascendra/

Technology studio for custom software, conversion-focused business websites, and offline-first IoT systems across the US and Egypt.

- Flagship systems include Sahel Gate (offline-first QR access) and Full School System
- Stack includes React, Next.js, TypeScript, NestJS, PostgreSQL, Flutter, Python

Video Game Sales Analysis | Data Analyst
Interactive Power BI dashboard analyzing 16,000+ video game sales records across regions to identify platform, genre, and market trends for forecasting and targeting.

- Technologies: Power BI, data modeling, dashboard design

Machine and Deep Learning Workflows | ML Developer
End-to-end ML workflows: data collection, cleaning, transformation, model development, and evaluation using Python, Pandas, Scikit-learn, TensorFlow, and PyTorch.

Ticketing Management System Design | Software Analyst
Designed ERD, data dictionary, and technical specification for tickets, users, departments, priorities, and status logs.

Pharmacy Management System Planning | Project Planner
Project plan in Microsoft Project covering scope, tasks, timelines, resources, Gantt charts, and milestones.

EDUCATION
